## Developments in Wind Power Plant Projects

Developments have been recorded in the Environmental Impact Assessment (EIA) processes of Wind Power Plant Projects. According to Yatırımlar, developments recorded over the past week are as follows:

## New WPP Project, Whose EIA Process Has Kicked Off

Firm /Organization	Location	Capacity (MWe)	Project Cost	EIA File by
Progresiva Enerji AŞ	Tekirdağ-Süleymanpaşa-Muratlı	250	6.025.000.000 TL	En-Çev Enerji AŞ
SMS Yatırım AŞ	Samsun-Havza	36	468.000.000 TL	Obelya Mühendislik
Enerjisa Elektrik AŞ	Samsun-Ladik Amasya-Merkez-Suluova-Taşova	180	3.005.880.000 TL	Uzel Proje Ltd. Şti.

## Additional Capacity of 7,500 MW to be Announced for Unlicensed Renewable Investments

The Ministry of Energy and Natural Resources is to announce an additional capacity of 7,500 Megawatts for Unlicensed Renewable Investments.

According to Yatırımlar, investors at the same consumption point and city will be given priority up to a certain capacity. Especially industrialists will be able to use the new capacity in their renewable investments, especially solar and wind. In this way, an investment of 5 billion dollars is expected.

## Sivas Municipality Prepares Tender for SPP Construction

Sivas Municipality, Planning and Project Directorate is preparing a tender for "Construction of Solar Power Plant (SPP) 4 and 5."

According to Yatırımlar, design work has been completed. The tendering process will begin once the Environmental Impact Assessment (EIA) process has been completed and connection agreements have been signed.

A loan application will be made to İlbank or World Bank to finance the project after the completion of financing studies to be carried out.

The proposed power plants will be built in Sivas, Merkez, Çelebiler Village.

2 solar power plants with a capacity of 7.5 MWe will be installed using 30,680 solar panels and 50 inverters to generate 44,020,390 kWh of power annually.

Previous article:1672-15 January 2024

## EIA Process Kicks Off for Eti Bakır AŞ's "Group 4 Mine, Underground Quarry, Flotation Facility & Waste Storage Facility Project"

Eti Bakır AŞ has kicked off preparatory work on its "Group 4 (Copper, Zinc, Pyrite) Mine, Underground Quarry, Flotation Facility & Waste Storage Facility (Including Mobile Ready-Mixed Concrete Facilities, Mobile Crusher, Water Supply Reservoir), Aboveground Mobile Explosives Storage and Underground Explosives Storage Project (License Number 202300459 (Er: 3419460)", which will be developed in Elazığ, Maden.

According to Yatırımlar, the project application file prepared by MGS Proje Ltd. Şti. for this 9.000.000.000 TL project has been submitted to the Ministry of Environment, Urbanization and Climate Change. The Ministry has reviewed the file and started the EIA process. The underground mine ore amount is 32,885,000 tons (28 years), underground pit excavation amount is 39,357,005 tons (28 years), flotation facility's capacity is 1,500,000 tons/year, waste storage facility's capacity is 15,000,000 m3 (28 years) and the ready-mixed concrete power plants' capacity is 200 m3/hour.

## "EIA Not Required" Decision Issued for Eti Krom AŞ's "Induction Furnace Project"

Eti Krom AŞ is continuing preparatory work on its "Induction Furnace Project", which will be developed in Elazığ, Kovancılar.

According to Yatırımlar, the Ministry of Environment, Urbanization and Climate Change (MoEU) has issued "Environmental Impact Assessment (EIA) not required" decision for this 63.335.130 TL project, whose project introduction file (PIF) was prepared by Aktel Çevre Danışmanlık Ltd. Şti.

Project description: There are currently 7,600 tons of AGK 0 - 1 mm table metal and 50,000 tons of unprocessed products at the work site. Under the project, 2 induction furnaces with an annual capacity of 3,600 tons will be installed to process these products and the ferrochrome powders that will be formed. The warped iron and chrome alloy liquid formed in induction furnaces will be poured into a 100-ton metal pool. The product that is captured in the pool will be turned into a salable piece product and offered for sale.

Previous article:1667-11 December 2023

## EIA Process Kicks Off for Petrol Ofisi AŞ's "Yarımca Terminal Capacity Increase Project"

Petrol Ofisi AŞ, Yarımca Terminal Branch has kicked off preparatory work on its "Yarımca Terminal Capacity Increase (Addition of 2x 5,000 m³ LPG Tanks) Project", which will be developed in Kocaeli, Körfez.

According to Yatırımlar, the project introduction file prepared by MGS Proje Ltd. Şti. for this 150.000.000 TL project has been submitted to the Ministry of Environment, Urbanization and Climate Change. The Ministry has reviewed the file and started the EIA process.

## EIA Process Kicks Off for Hattat Enerji AŞ's "Coal Preparation Facilities, Filling Area, Dock & Hard Coal Production Project"

Hattat Enerji ve Maden Ticaret AŞ has kicked off preparatory work on its "Coal Preparation (Washing) Plants, Washing Waste Storage Plants, Filling Area, Dock and Hard Coal Production Integrated Project (on the License Area No. IR 86970)", which will be developed in Bartın's Amasra and Merkez districts.

According to Yatırımlar, the project application file prepared by MGS Proje Ltd. Şti. for this 4.500.000.000 TL project has been submitted to the Ministry of Environment, Urbanization and Climate Change. The Ministry has reviewed the file and started the EIA process.

The project includes the following components:

- Filling area, breakwater, dock and service buildings,
- 3 coal preparation (washing) plants (2 with a capacity of 200 tons/hour and 1 with a capacity of 500 tons/hour),
- Underground mine for hard coal production.

The 21-year period, starting from 04 June 2024 until 07 February 2045, has been planned as the production period to cover the production of 56 million tons of run-of-mine hard coal (average 2.7 mt/year). It is planned to apply a reversible fully mechanized production method in production panels.

## Byport AŞ's "Propane to Polypropylene Plant Project" Opened to Public Opinion

Byport Petrol Ürünleri Terminal Hizmetleri AŞ is continuing preparatory work for its "Propane to Polypropylene Plant, Water Intake Structure and Deep Sea Discharge Project", which will be developed in Hatay, Erzin district, Aşağıburnaz quarter, Gaziçiftliği locality.

According to Yatırımlar, the Environmental Impact Assessment (EIA) report for this \$1.250.000.000 project has been reviewed, finalized and opened to public opinion by the Inspection & Evaluation Commission.

The project's EIA report was prepared by En-Çev Enerji.

The proposed plant is expected to produce 350,000 tons of polypropylene (PPP) per year, which accounts for three times the amount of Turkey's total polypropylene output.

KİK:2024/60158

## ASKİ Prepares Tender for Capacity Increase of İvedik Drinking Water Treatment Plant

Ankara Metropolitan Municipality Water and Sewerage Administration (ASKİ) General Directorate is preparing a tender for "Capacity Increase of Merkez (İvedik) Drinking Water Treatment Plant."

According to Yatırımlar, the tendering process is due to begin in the second half of the year once tender documents have been prepared and necessary approvals secured.

To finance the project, ASKİ has provided a loan of €65,000,000 from the World Bank through İlbank.

The contract involves the construction of a Phase 4 drinking water treatment plant with a capacity of 560,000 m3/day.

The capacity of the İvedik Drinking Water Plant, which is among the largest drinking water treatment facilities in Europe and currently operates with 3 units, will be 2,226,000 m3/day with the completion of the Phase 4 capacity increase.

İvedik Drinking Water Treatment Plant, which serves 90% of Ankara, covers an area of 851 thousand 204 square meters. The Phase 4 capacity increase project will be carried out on an area of 221 thousand square meters. Water to the plant is supplied from Kurtboğazı Dam, Çamlıdere Dam and Kesikköprü Dam.

Financial bids of the "Review of the Annex No: 1 Design, Preparation of Tender Documents and Construction Supervision Services Consultancy" tender under the World Bank-financed "Ankara Merkez (İvedik) Water Treatment Plant Capacity Increase (4th Unit) Project" will be opened on 2 February 2024 at 14:30.

Previous article:1659-16 October 2023

## ASKİ Continues Prep Work for Capacity Increase of Central WWTP's Cogeneration Facilities & SPP Project

Ankara Metropolitan Municipality, Water and Sewerage Administration (ASKİ) General Directorate is continuing preparatory work for "Capacity Increase of Ankara Central (Tatlar) Wastewater Treatment Plant's Cogeneration Facilities (17,3 MWe/41,2 Mwt), Overhaul of the Plant as an Advanced Biological Treatment Plant and 8,125 MWe/8,208 MWp Solar Power Plan Project."

According to Yatırımlar, Ankara Metropolitan Municipality Council's approval is being awaited for the project's preparatory work to begin.

To finance the project, ASKİ has secured loans from the French Development Agency (AFD) and the International Finance Corporation (IFC) institutions within the World Bank Group.

The project, which received "Environmental Impact Assessment (EIA) positive" decision and the Environmental Impact Assessment (EIA) report of which was prepared by 2U1K Mühendislik, involves adding new units to the facility by increasing the capacity of the facility in two stages and increasing the treatment efficiency of the facility by rehabilitating the existing units.

It is planned to increase the daily capacity from 765,000 m3 to 1,350,000 m3 with the completion of the first stage, and from 1,350,000 m3 to 1,700,000 m3 with the completion of the second stage. Excess sludge generated in the existing treatment plant will be fermented in anaerobic digesters to obtain biogas. Thanks to the cogeneration system currently having an installed capacity of 3.2 MW, part of the plant's power needs will be met from the energy produced.

As the plant's power needs will also increase with the capacity increase, an 8,125 MWe/8,208 MWp solar power plant will be built and part of the power needs of the plant will be met from this solar power plant.
